Summary

Computer Science graduate (CGPA 9.3) with a strong foundation in data structures, algorithms, and application security. Experience building and deploying full-stack, cloud-hosted applications on AWS, and performing manual security testing to identify and remediate OWASP Top 10 vulnerabilities using Burp Suite. Comfortable working across the stack, from backend APIs and relational databases to infrastructure and CI/CD.

Skills

Languages: Python, C++, Java, JavaScript, SQL, HTML5, CSS3

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, System Design, Code Review, Git/GitHub, REST APIs

Cloud & DevOps: AWS (S3, Lambda, EC2, RDS, VPC, IAM, EventBridge, ALB, CloudWatch), Docker, GitHub Actions (CI/CD), Boto3

Databases: MySQL, PostgreSQL, SQLite, Relational Schema Design, Query Optimization

Application Security: OWASP Top 10, Burp Suite, SAST/DAST, JWT & Session Analysis, Vulnerability Assessment, Input Validation

AI/ML Tooling: LangChain, ChromaDB, OpenCV, Vector Search

Experience

Oracle

Project Intern – Application Security Analyst

Jan 2026 – Present

- Performed manual security testing and source-code review on enterprise applications, identifying and helping remediate OWASP Top 10 vulnerabilities including SQL Injection, XSS, and insecure data logging.
- Analyzed HTTP/HTTPS traffic in Burp Suite to detect authentication and session-management flaws, including JWT validation gaps and privilege-escalation paths.
- Reviewed application logic and data flow across backend services to surface edge-case bugs and security gaps ahead of release.
- Triaged findings from SAST/DAST scans by severity and exploitability, and documented remediation guidance for development teams.

Projects

CloudVault – Secure File-Sharing Platform

Python, Flask, AWS (S3, Lambda, VPC, EC2, RDS)

- Built and deployed a secure file-sharing app with Flask and Boto3, using time-bound pre-signed S3 URLs and Lambda functions triggered by EventBridge to auto-expire files after 24 hours.
- Designed a custom VPC with public/private subnets and least-privilege IAM roles, and provisioned a PostgreSQL RDS instance accessed securely through an SSH-tunneled EC2 bastion host.
- Set up a CI/CD pipeline with GitHub Actions running automated pytest suites and a Dockerized build, backed by CloudWatch alarms for monitoring.

RAG-Based Student Assistant for Academic Resource Access

Python, Flask, LangChain, ChromaDB

- Built a Retrieval-Augmented Generation assistant with LangChain, ChromaDB, and the OpenRouter API to answer questions using context retrieved from ingested course PDFs.
- Implemented a PDF ingestion and semantic search pipeline with TF-IDF query classification, exposed through a Flask REST API and web frontend.

Smart Medication Alert System using Image Processing

Computer Vision, OpenCV, SQLite, Twilio API

- Built a computer-vision system with OpenCV to detect missed or incorrect medication doses from image input, logging results to SQLite.
- Integrated the Twilio API to trigger automated SMS and call alerts, reducing reliance on manual caregiver monitoring.

Education

JNTUH University College of Engineering, Science & Technology, Hyderabad

2021 – Present

Integrated B.Tech-M.Tech in Computer Science and Engineering

CGPA: 9.3

Narayana Junior College, Hyderabad

2019 – 2021

Intermediate Education – MPC

Percentage: 98.8%

DAV Public School, Hyderabad

2007 – 2019

Secondary Education

Percentage: 96.0%

Leadership and Activities

Club Lead, JNTUH Data Science Student Club

Nov 2023 – Nov 2024

- Led a 200+ member student community, organizing technical events and a chatbot-focused hackathon, and coordinating onboarding for new members.

Workshop Coordinator, QUEST 2024

Mar 2024 – Apr 2024

- Coordinated logistics for multi-disciplinary technical workshops in Cyber Security and Machine Learning, serving 150+ participants.

Certifications & Technical Training

- Yellow Belt & White Belt Security Expert** – Oracle Internal Technical Qualification *2026*
- AI Security Essentials Specialization** – Proactive Security for AI Models, Attacks & Lifecycles *2026*
